Detailed error de- scription / remark			

- Repair conditions
1.

For your return an inspection lump sum of € 30.00 per component will be charged as a processing fee. In the case of an incorrect delivery by SIMON PROtec, warranty or warranty processing, this lump sum may be waived.

2.

If it is a fee-based repair, we repair immediately according to the above listed lump sums without prior offer.

3.

Repair within the warranty: If the cause of the defect after inspection is not due to a warranty claim, an offer will be made to you about the repair.

4.

You will receive an order confirmation with information about the run time. If the goods are irreparable (for example, because of discontinued spare parts or disproportionately large repair costs) will proceed as you have chosen above.

5.

A detailed error analysis is not part of the repair lump sums. If a component has been changed, you will be informed about this in the order confirmation.

6.

For special actuators and devices, we reserve the right to make a separate offer.

7.

A detailed list of all discontinued products can be found online at www.simon-protec.com.

We hereby accept the above conditions for repair:

Date, place, stamp, signature (commissioner)*
